EARLY DETECTION OF DEMENTIA

# Spring 2024 Newsletter

## IN THIS ISSUE

### *New resources on our website!*

- Webinar recordings and clips
- NEW! Early detection of dementia toolkit, co-branded with the CDC

### *Upcoming Events: Read more and register today!*

- PHCOE on Dementia Caregiving webinar on March 18th
- NADRC webinar on April 9th
- Tight blood pressure control – can we prevent dementia among older adults?

### *Colorado ADRD Action Coalition CME module*

### *Book release*

- *Population Science Methods and Approaches to Aging and Alzheimer's Disease and Related Dementias Research*

### *Call for papers - Managing neurodegenerative disease in primary care*

# Webinar Recordings Are Now Available!

## Statewide Dementia Screening Linked to Diagnostic and Social Services

### *Implementation Strategies and Lessons Learned*

Thank you to all 372 live audience members who joined us to hear from our colleagues Nathaniel Chin, MD (*top left*) and Krista Pfister, MSW, APSW (*bottom left*) to learn more about their efforts, partnerships, and experiences in early detection.

**Watch the January 31st recording here!**

## Implementing Dementia Services System-Wide

### *Becoming a Prepared Leader*

Thank you to all 191 live audience members who joined us to hear from our colleagues Kristen Felten, MSW, APSW (*top right*) and Lisa M. Gibbs, MD (*bottom left*) on dementia leadership preparation and their efforts in early detection of dementia.

**Watch the February 12th recording here!**

# New Resource: 'Webinar Excerpts'

Short on time and can't watch a full webinar? We are pleased to present a new series of webinar clips on our Center website.

Catch up on the key take-homes from our webinars in these short (<5 minute) clips!

**Access all of our webinar recordings and the new webinar excerpts on our "Webinars" page**

# New Early Detection Toolkit

## Developed in collaboration with the CDC

The BOLD Center on Early Detection of Dementia, in collaboration with the CDC, is pleased to share a new toolkit resource for clinicians, administrators, and patients engaged with large health systems are interested in promoting early detection of dementia, establishing supportive services, and becoming more 'dementia-capable'. It supports a comprehensive approach to dementia detection and includes resources that encompass a broad view of the capacities needed to make your efforts most effective and cultivate a supportive and sustainable care pathway for individuals and their families.

# Upcoming PHCOE on Dementia Caregiving Webinar

## Using Crowdsourcing to Support Dementia Caregivers: Opportunities For Public Health

[Learn more and register today!]

**Stay up to date on their events by visiting their [events calendar].**

# Upcoming NADRC Webinar

## Sustainability: Keeping Dementia Programs Active Years After Initial Funding Ends

On **April 9, 2024, from 2-3 p.m. ET**, the National Alzheimer's and Dementia Resource Center will host the webinar, ***Sustainability: Keeping Dementia Programs Active Years After Initial Funding Ends.***

Funding for dementia programming is often time limited, and early planning and flexibility is necessary to have the best possible outcomes for sustaining successful programs. In this webinar, participants will hear about two programs that have been sustained years after initial program funding ended. Southern Maine Agency on Aging received funding for an ACL dementia grant in 2014. During their grant period, they developed an expanded Meals on Wheels assessment that integrated questions related to dementia. The assessment proved successful in helping to identify people living with dementia in the community and has been maintained since the end of the grant project in 2017. Southern Maine Agency on Aging will talk about the impact of ACL funding and how they worked to maintain their original program. Michigan Department of Community Health was awarded an ACL dementia grant in 2016. During their grant period, they implemented caregiver trainings focused on basic dementia information, brain health and behavior, and activities for people living with dementia. After the project ended in 2020, the Department of Community Health worked with the Michigan Area Agencies on Aging (AAA) to adapt the training and handed over management and dissemination of the trainings to the AAA network. In this webinar, participants will learn about how the caregiver training was adapted and how it is being sustained by AAAs.

**Learn more and register today!**

If you have questions, please email NADRC-Webinars@rti.org. Registration is required. This webinar will be recorded and posted to https://nadrc.acl.gov/.

# Upcoming Panel

## Tight blood pressure control – can we prevent dementia among older adults?

**A Controversies in Population Health panel** (co-sponsored by the Dept of Population Health and the Optimal Aging Institute)

**Monday, April 15, 2024**

**3:30 –5:00 PM (Reception to follow)**

**Webinar registration:** https://nyumc.webex.com/weblink/register/r46b249885d2b542b87906deeb4d6f75f

**In-person**: NYU Langone Health, 550 First Avenue, Smilow Seminar Room

**Panelists**:

Omonigho Michael Bubu, MD, PhD, MPH (NYU Grossman School of Medicine)

Rebecca Gottesman, MD, PhD (NIH)

Jiang He, MD, PhD (Tulane University)

Costantino Iadecola, MD (Weill Cornell Medicine)

Gbenga Ogedegbe, MD, MPH (NYU Grossman School of Medicine)

Sakina Ouedraogo Tall, MD (NYU Grossman School of Medicine)

**Moderated by**: Josef Coresh, MD, PhD, (NYU Grossman School of Medicine)

# Colorado ADRD Action Coalition CME Module

The Colorado ADRD Action Coalition, in partnership with University of Colorado Practice Innovation, developed an eLearning Module Learning Opportunity: **Alzheimer's Disease and Related Dementias in Primary Care: Addressing Risk Factors, Early Diagnosis, and Care Planning**. This is an informational and interactive eLearning module designed for primary care teams to increase their knowledge and skills related to ADRD. The module discusses risk factors for ADRD, risk reduction strategies, evidence-based practices for culturally sensitive ADRD care, identifying a care partner, and using a team approach to ADRD care.

The module is free for all learners (across the United States) and completers of the module will receive two American Academy of Family Physicians (AAFP) CME credits. This is a great resource for primary care teams.

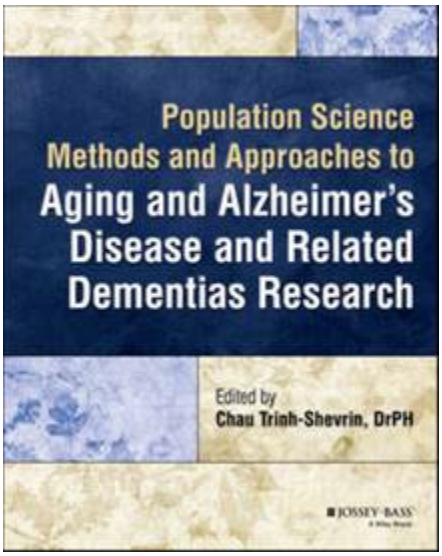
To access the module please go to: https://cuelearning.org/

Click the Register link to create an account. For the Registration Code, please enter "**ADRD**" (not case sensitive). Please reach out to Monica Maly (monica.maly@state.co.us) with questions!

# New Book Publication

## *Population Science Methods and Approaches to Aging and Alzheimer's Disease and Related Dementias Research*

We are pleased to announce the newly published book, edited by our co-investigator, Chau Trinh-Shevrin, DrPH, with contributions from our Center co-lead, Joshua Chodosh, MD, and co-investigator, Matthew Lee, DrPH, MPH.



***Gain a thorough understanding of the determinants of health among aging populations, how disparities arise in diverse communities, and what can be done***

Learn more and get the book at Amazon, Walmart, or Barnes & Noble

# Call for Papers

## Managing Neurodegenerative Disease in Primary Care

BMC Primary Care invites submissions for a Collection on Managing neurodegenerative disease in primary care. The Collection emphasizes the need for innovative strategies in primary care, covering early detection, interdisciplinary management, patient-centered interventions, technology integration, and education/training for providers.

Aligned with the UN Sustainable Development Goal 3: Good Health and Well-being, the Collection underscores primary care's crucial role in improving health outcomes for those affected by neurodegenerative diseases.
